

Driving Agility in the Biotech Industry

Transforming Complexity into Opportunity with Anaplan

The biotech industry is complex, requiring collaboration with CMOs, regulatory compliance, and a supply chain that can respond to changes quickly. Companies face challenges like multi-step production, market-specific requirements, and ever-changing supply networks. The speed of business & innovation creates a high amount of pressure within the biotech space, hence real-time scenario's and financialization are key to stay aligned between cross-functional stakeholders & drive supply network optimization.

Flexible Data Model to Adapt to Supply Chain Changes

The biotech supply chain constantly changes due to regulations, market demands, and operations. Anaplan's flexible data model helps companies quickly adapt & keep the planning solution in sync with the current needs & supply chain network.

End-to-End Supply Network Optimization

The embedded optimizer helps biotech companies to manage their end-to-end planning aligning production, distribution & inventory in their internal & external supply chain network, even in highly regulated and fast-changing environments. The extensive scenario planning capabilities enable agility to react to supply disruptions & demand changes.

Rapid Time-to-Value with Flexible Model Building

Anaplan's platform allows biotech companies to quickly implement fit for purpose models without heavy IT support, speeding up time-to-value. This agility is key in an industry where speed to market offers a competitive edge.

Empowering Autonomy and Agility through a Center of Excellence

An internal Center of Excellence (CoE) for Anaplan gives biotech companies autonomy and agility in planning. It builds internal expertise, speeding up planning and improving response to internal & external changes.

Seamless Master Data Maintenance

Critical master data is often missing or spread across platforms & spreadsheets. Anaplan can clean existing masterdata & maintain missing elements within the platform itself ensuring accurate, consistent information crucial for end-to-end planning.

Enterprise-Wide Scalability through Connected Planning

Anaplan's connected planning offers enterprise-wide scalability across finance, supply chain, and operations. For biotech, it unifies planning processes, enabling data-driven decisions for long-term success.

In the fast-paced and complex biotech industry, agility and innovation are key to staying ahead of the competition. Anaplan offers a powerful platform that addresses unique industry challenges, enables efficient supply chain management, data integration, and connects planning to ensure compliance, efficiency, and growth. With a future-proof technological roadmap and the ability to scale across the enterprise, Anaplan is the strategic partner that biotech organizations need to thrive in an increasingly competitive landscape.
